CARRIER OBJECTIVE

To leverage my skills and experiences in software development, UX design, and frontend development to contribute effectively to a good team environment. Interested about crafting user-centric solutions and eager to drive innovation in projects that push the boundaries of technology.

PROJECTS

-
- Student list management System**
 - Architected and implemented the Student List Management System, optimizing database queries for performance, which led to a 30% reduction in application loading time and enhanced user experience.
 - Door Lock System with Facial Recognition Using Node MCU**
 - Conceptualized and executed a groundbreaking IoT initiative titled 'Door Lock System with Facial Recognition Using Node MCU,' resulting in a 50% decrease in security breaches and a 40% improvement in access control efficiency.
 - Tourism Management System With Chatbot Support**
 - Engineered and deployed a cutting-edge Tourism Management System with Chatbot Support, revolutionizing travel experiences; facilitated a 40% increase in customer satisfaction through streamlined booking processes and personalized recommendations.

The above project details are available on my LinkedIn profile, which is linked at the top of my resume.

TECHNICAL STRENGTHS

-
- Software & Tools**
 - MS Office
 - Figma.
