Professional Summary

Experienced JavaScript Developer with 4+ years of experience in building interactive web applications using modern JavaScript frameworks. Proficient in React.js, Node.js, and implementing RESTful APIs. Strong background in front-end optimization, responsive design, and building efficient web applications in Agile environments.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks/Libraries:** React.js, Redux, Node.js, Express.js, jQuery
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, Webpack, Babel, npm, Jenkins, Docker
- **Other:** RESTful APIs, Unit Testing (Jest, Mocha), Agile methodologies, Continuous Integration (CI/CD)

Professional Experience

JavaScript Developer

CloudSoft Solutions, Seattle, WA

July 2020 – Present

- Designed and developed highly interactive single-page applications (SPAs) using React.js and Redux.
- Built and maintained RESTful APIs using Node.js and Express.js for back-end services.
- Collaborated closely with UX/UI teams to optimize front-end performance and deliver smooth user experiences.
- Implemented asynchronous operations (AJAX, fetch, Promises) to handle real-time data from third-party APIs.
- Refactored legacy codebase, reducing load times by 25% and improving code maintainability.
- Contributed to the automation of unit testing using Jest and integrated test coverage into the CI pipeline using Jenkins.

Junior JavaScript Developer

NextGen Tech, Seattle, WA

May 2018 – June 2020

- Developed responsive web applications using vanilla JavaScript, HTML5, and CSS3.
- Assisted in building components with React.js and maintained legacy jQuery-based systems.
- Built REST APIs with Node.js and Express, integrating third-party services.

- Collaborated with designers and back-end developers to ensure smooth data flows and maintain a responsive UI.
- Participated in Agile sprints, handling front-end and back-end tasks for various projects.

Projects

E-commerce Platform

- Developed a scalable e-commerce web app using React.js, managing dynamic product listings, shopping cart functionality, and checkout workflows.
- Integrated payment gateways (Stripe) and shipping services (FedEx API) for seamless transactions.

Social Media App

- Created a social media platform with real-time chat features using WebSockets and Node.js.
- Deployed the app with Docker and set up CI/CD pipelines to streamline deployments.

Education

Bachelor of Science in Computer Science

University of Washington, Seattle, WA

Graduated: May 2018

Certifications

- React & Redux Certification – Udemy
- JavaScript Algorithms and Data Structures – freeCodeCamp
