Objective

Computer Science graduate with hands-on experience in Go development, seeking an entry-level position to further develop skills in building backend systems, APIs, and cloud applications.

Education

Bachelor of Science in Computer Science

University of Washington, Seattle, WA

Graduated: May 2024

- Relevant Coursework: Distributed Systems, Algorithms, Networking, Cloud Computing

Skills

- **Languages:** Go, Python, Bash
- **Frameworks/Libraries:** Go standard library, Gin, GORM
- **Databases:** MySQL, MongoDB
- **Tools:** Git, Docker, Kubernetes (basic), Postman, VSCode
- **Other:** REST APIs, Microservices, Cloud Computing (AWS basics)

Projects

URL Shortener Service

- Developed a URL shortening service using Go, Gin framework, and MongoDB.
- Implemented basic authentication and created RESTful APIs for URL management.

Go CLI Application

- Created a CLI tool for file operations (copy, move, delete) using Go's standard library.

Experience

Backend Developer Intern

Cloud Innovations, Seattle, WA

June 2023 – August 2023

- Built microservices using Go and Docker, interacting with various APIs and databases.
- Worked with senior developers to improve the performance of the company's cloud-based services.

Certifications

- Introduction to Go Programming – Udemy
